Government Hikes Support Price for Cotton During 2011-12

By its Order dated 11th August 2011, the Government of India fixed the minimum support price (MSP) of two basic varieties of cotton, viz., Medium Staple Length Cotton having staple length of 24.5 to 25.5 mm with micronaire value of 4.3 to 5.1 and Long Staple Length Cotton having staple length of 29.5 to 30.5 mm with micronaire value of 3.5 to 4.3 of new crop of cotton kapas of Fair Average Quality (FAQ) for cotton season 2011-12. The MSP for Medium Staple Length Cotton was fixed at Rs.2,800 per quintal and that for Long Staple Length Cotton at Rs.3,300 per quintal. These prices are higher by Rs.300 per quintal compared to the MSP fixed for 2010-11.

Based on the MSP for these two basic classes of seed cotton (kapas) and taking into account the quality differential, normal price differential and other relevant factors, the MSP for other classes of seed cotton (kapas) of Fair Average Quality (FAQ) for the cotton season 2011-12 (October-September) has been fixed by the office of the Textile Commissioner. These prices fixed for 2011-12, along with the corresponding prices for 2010-11 are given in the accompanying table.

Further clarifications given are as under:

- (i) If the micronaire value is in the range of 3.8 to 4.2 for staple length (mm) of 24.5-25.5 mentioned at Sr. No. 6, a premium of Rs. 30 per quintal will be given over and above the MSP. If the micronaire value happens to be less than 3.8 or more than 5.1, the MSP will be lower by Rs. 15 per quintal for every 0.2 micronaire.
- (ii) If the micronaire values are outside the range in the column (iv) for staple length at Sr. No. 9

- to 15, a lower MSP of Rs. 25 per quintal will be given for every 0.2 micronaire value.
- (iii) The minimum acceptable micronaire value shall be 2.8 for Extralong Staple Cotton mentioned at Sr. No. 13 to 15. Minimum acceptable micronaire value shall be 3.0 for other varieties of cotton at Sr. No. 1 to 12 of the above table.
- (iv) The names of varieties mentioned in column (vi) of the accompanying table are only indicative related to the respective length group.

DGFT Allows Traders to Obtain More than One Export Permit for the Cotton Season 2010-11

It is reported that in a bid to ease norms for cotton exports, the Directorate General of Foreign Trade (DGFT) has allowed from August 18, 2011, traders to obtain more than one export permit for the current marketing year ending September 2011. Accordingly, DGFT has deleted a clause in the notification of August 04, which had stipulated that an exporter must give an undertaking that "no other application is being submitted or has been submitted for obtaining registration certificate to export cotton to any office of DGFT". Exporters had also to declare that "in respect of registration certification obtained earlier, if any, the proof of having completed exports in full has been submitted to the concerned regional authorities".

The Centre for Monitoring Indian Economy (CMIE) has revised its real GDP forecast for FY12 downwards, from 8.6 to 8.1 percent. The forecasts for all major sectors have been scaled down. The reason for the scaling down differs from sector to sector. None of the major sectors have seen an upward revision in their forecasts, CMIE stated in its monthly review.

According to the Union Ministry of Agriculture, the area planted to cotton by 19th August 2011 exceeds last year's planted area by the same date by ten lakh hectares. The area planted this year is placed at 116.8 lakh hectares as against 106.8 lakh hectares planted last year. Thus, indications are that by the time plantings are over, the cotton

area in 2011-12 will be an all-time record. The area during 2010-11 was estimated by the Cotton Advisory Board to be 111.42 lakh hectares.
